Objective

To create and maintain software that my colleagues and others will find useful and a pleasure to use, and to further my skills in Linux server administration.

Skill Summary

- Linux server administration, including server applications such as Apache, MySQL, Postfix, Courier (IMAP and POP3). I am also proficient in using Linux as a desktop OS.
- Languages: Proficient in Python, Java, Perl, and PHP. I have experience using Ruby, Objective-C, C, and C++.
- Databases: Experience using MySQL and SQLite.

Work Experience

SENDOUTCARDS.COM

Salt Lake City, Utah

Programmer, Systems Administrator

Mar 2003-Present

- Maintained and added features to our main software application.
- Set up and maintained our server cluster with a combination of the web proxy Pound, NFS, and MySQL replication.
- Wrote new applications in Java and Python to help maintain several of our systems.

NET-BIZZ.COM

Alpine, Utah

Programmer

Feb 1999-Dec 2002

- Maintained and added features to our main software application, written in Perl.
- Wrote new applications in Perl and PHP to help the company better manage it's time.
- Rewrote our main software application to be better, using PHP and MySQL.

Open Source Community Involvement

- *Exaile* (<http://www.exaile.org>) - *Python*: Creator and lead developer in the project. Since it was made publicly available in March 2006, Exaile has grown a large user base. It is available in most of the major Linux distributions, and has received reviews from Linux.com and PC World magazine.
- *Jbother* (<http://www.jbother.org>) - *Java*: Creator and lead developer in the project. Many universities (such as UCLA) have modified this project for education or for use in their systems.

Education

- Graduated from Lone Peak High school (Highland, Utah) in 1998.
